

## East Greenwich Township Police Department

### Body Worn Camera Program

The East Greenwich Township Police Department has been utilizing Body Worn Cameras (BWC's) in our daily patrol functions since 2016. We are in compliance with the recently revised and updated Attorney General's Directive 2021-5.

The East Greenwich Township Police Department currently utilizes the L3 Body Vision High Definition camera that affixes to the front of an officer's duty uniform. The photos depicted show the camera in the off position and the recording position (green light showing).

We want to remind the public that these cameras will be utilized by officers during patrol as well as interactions with citizens in East Greenwich Township. With the implementation of this BWC system, all incidents and interactions with the police will be recorded according to the East Greenwich Township Police Department's policy on same.
